

About Us

For almost 40 years, Rapid Enterprises has been dedicated to quality, promptness, and an absolute mastery of our craft. At Rapid Enterprises, we take quality seriously and are independently audited to be in conformance with ISO 9001:2015 international quality standards.

With our “do it once, do it right” philosophy, you’ll see that our motto is what we live by. This is why the majority of our business comes from positive word-of-mouth referrals.

From start to finish, we aim to make your bottom line more profitable and efficient. Rapid Enterprises helps control development costs and shorten time-to-market by reacting to design changes quickly and efficiently – the Rapid way.

Our success is directly related to the competence of our employees. It's the people that make the parts. Our employees are well-trained and we are dedicated to continually improving their skills.

“Precision manufacturing” characterizes our operation like no other. No matter the processes involved, Rapid provides its customers with a finished product to perfect precision.

With decades of prototyping experience, Rapid is proficient in assisting customers develop original concepts, produce blueprints, manufacture customer engineered components, and provide input on design changes in order to reduce manufacturing costs as well as production time. When it's all said and done, our coordinate measuring machine (CMM) inspects and verifies that each piece is sculpted and shaped to perfection – or at least to within ten-thousandth of an inch!

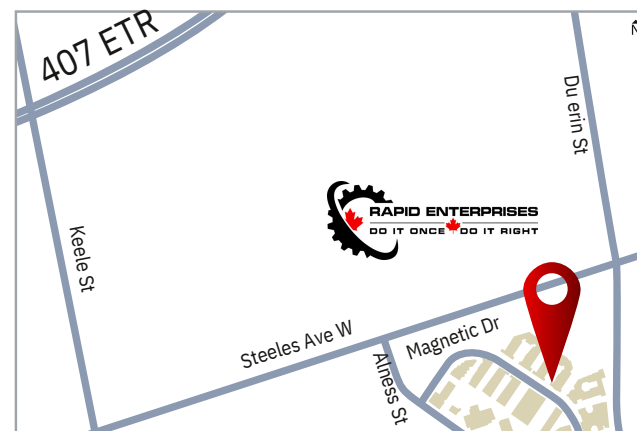

“We’re only as good as our last job – and our last job was excellent.”

Rapid's Process

Design

Programming / CAD CAM

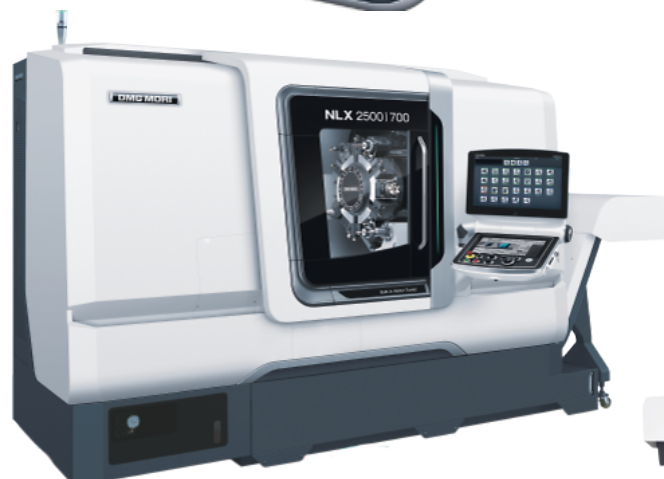

Multi Axis High Precision Machining

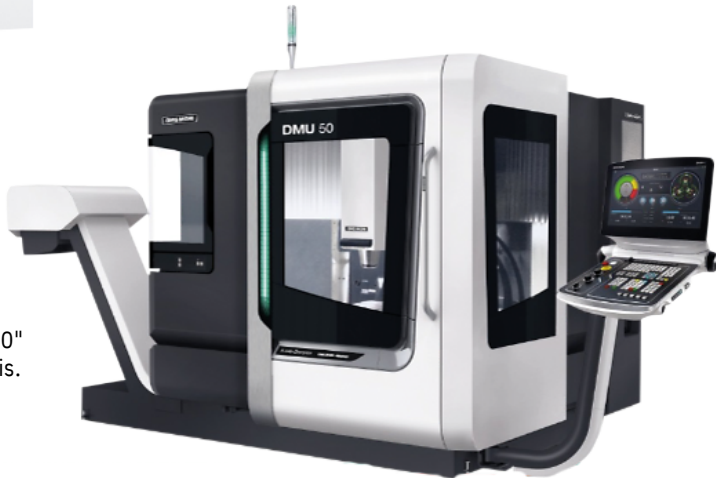

Inspection CMM

DMU 65 MONOBLOCK
5-Axis precision CNC Milling machine that provides high speed dynamic machining.

DMG MORI NLX 2500/700
High-performance, large-capacity lathe, with a 10" chuck, 3" through bore and live tooling with Y axis.

DMU 50
5-Axis precision CNC Milling machine that provides high speed dynamic machining.

Our Equipment

CHEVALIER SURFACE GRINDER
Column type high precision 3-axis fully automatic programmable Surface Grinder.

CRYSTA APEX S (CMM)
High-accuracy coordinate measuring machine with a 5-axis PH10 head that guarantees a maximum permissible error of 1.7 µm.

MILL TAP 700
Compact 5-Axis machine DMG MORI MILLTAP 700, 24k RPM, 15-tool mag, capable of reaching speeds of up to 3000"/min.

DMC 1035V
3-axis machining center that can machine parts of up to 40" long.

DMC 1035 V ECO LINE
3-axis machining center that can machine parts of up to 40" long.
